Subject: Unable to find libblas.so
Posted by Ed Wright on Tue, 08 Feb 2000 08:00:00 GMT

To: IDL Experts
From: Ed Wright JPL NAIF

A problem occurs since an upgrade from 5.2 to 5.3 (I did not perform the upgrade)
on an IRIX box. Any attempt to start IDL causes an error message which states the library
libblas.so cannot be found. The library seems not to live on my box.

Does information exist which describes this library?

As always,
Ed Wright
