
Subject: Adding .sav files to menu in ENVI

Hi,
Does anybody know how a .sav file automatically adds itself to the menu structure in ENVI? For example, when I added some add-on modules (ATREM, etc.) from RSI, after the .sav files compiled at start-up they are visible in the Spectral Tools menu item, yet there is no entry for them in the envi.men file. This would be so much nicer than having to tell whoever I'm passing a program to how to edit the menu file. I haven't been able to find documentation on this anywhere... Thanks for any help!

Chris
