Luca Fini (lfini@arcetri.astro.it) has lots of strange characters in his code, but I think I get the gist of what he is asking when he writes:

```
> I've a strange problem as shown by the following test program, stored in  
> file "prova.pro":  
>  
> Txt =3D OBJ_NEW('Idlgrtext')=09=09; Create a gaphic oject  
> whichfont =3D txt->GetProperty(Font)=09; Ask for info about it  
> END
```

Although "GetProperty" sounds as though it is going to be a function method for sure, it is really a procedure method. So the code will look like this:

```
txt = Obj_New("IDLgrText")  
txt->GetProperty, Font=theFont  
Print, theFont
```

Cheers,

David
