Subject: IDL for Windows 2000?
Posted by Reno Choi on Wed, 08 Mar 2000 08:00:00 GMT

RSI told me that they are not officially support Windows2000. And gonna upgrade their version with full support of Win2k in this year.
Equally, they should've made kind of patches for previous version like others. That's what we're call it 'service', isn't it? Upgrade doesn't solve everything, but money!~.
