hi everyone,

I would like to know where i can find or if anyone has an algorithm
or an IDL procedure for 2D limited angular tomography.

(It is not for medical application but for an radio-astronomical application.)

I would really appreciate if someone would have any info on this
and let me know.

pl. email to coulais@mesiom.obspm.fr or to acoulais@cnrs-orleans.fr

Thanks a lot..
Alain C.
