Try something like:

```
result = CW_BGROUP(base, ['Button 1','Button 2','Button 3'],  
/nonexclusive, set_value=[0,0,1])
```

where 0 is unset and 1 is set, or

```
result = CW_BGROUP(base, ['Button 1','Button 2','Button 3'],  
/exclusive, set_value=0)
```

where the value is the button to set. You can then change the settings  
with `widget_control` and `set_value`.

Chris
