---

We recently got a Floating-Type licence here, with the licence manager running on a Debian GNU/Linux 2.1 .

How do we get to run both IDL 5.2 and IDL 5.3 (by user's choice)?

We have licence.dat files for IDL 5.2 and for IDL 5.3 but it seems that they both want to be called  
.../rsi/license/license.dat

Thanks for any help, Kristian
