A working copy of O-Matrix has been placed in the anonymous
ftp directory on ftp.std.com, (192.74.137.7), at /ftp/vendors/omatrix

Download the README file for detailed information and instructions on
unpacking the self-extracting archive.

O-Matrix is a reasonably priced, (only $95), object-oriented analysis and
visualization tool for the PC that uses an interpreted "matrix" language.
A diverse library of graphics and numerical analysis routines are included.
