
Subject: Plot bug or another "strange feature" ?

Hi.

Does anybody notice and, eventually, know how to handle this "strange feature" of the plot procedure ?

```
IDL> s = indgen(1000) + 10000000000
```

```
IDL> plot, s, /ynozero
```

The plot is not a clean line joining down-left and up-right corners, but an ugly stairway...

Perhaps I missed the holy keyword...

Nicolas.
