Hello All

I am very new to IDL. I have been VTK for sometime. Right now for a project due to high-performance requirement, I am to use IDL for doing some volume rendering.

I have few questions. I wish somebody in the group will help me get started with IDL.

I want to write a custom reader for my data which is in a rectilineargrid format.
Then, I want to volume render the data.

Can somebody suggest me how to with IDL ?

Thanks a lot

Sincerely
Sathya
