Subject: pickfiles.pro for Windows?
Posted by Alex Schuster on Wed, 14 Jun 2000 07:00:00 GMT

Hi!

In one of my programs I use the pickfiles.pro routine to select multiple
files. Now I want it to run under Windows, too, but the pickfiles()
dialog does not work. It uses some SPAWNs and the test command, which
dows not exist under Windows.

Has anyone yet added support for Windows to the routine? My version is
from 3/97.

Alex
