Subject: axis in scientific notation Posted by noymer on Tue, 20 Jun 2000 07:00:00 GMT

View Forum Message <> Reply to Message

Hi. I would have thought this is a FAQ, but I could not find anything in teh Deja archives.

I have a graph in IDL direct graphics and IDL is writing the Y-axis in "scientific" or exponential notation -- i.e. 3.0x10<sup>4</sup> etc.

Is there a way to force normal notation?

I know I could draw my own ticks with custom labels or whatever --- I'm wondering if there is an easier way, tho.

TIA, Andrew noymer@my-deja.com
