Can the following FOR loop be vectorized?

```
samples=256
temp_arr=FLTARR(samples)
data_arr=FLTARR(5000)
ind_arr=LONG(LINDGEN(1000)*0.256)
```

```
FOR j=0L,samples-1 DO BEGIN
    temp_ind=WHERE(j EQ ind_arr)
    temp_arr(j)=data_arr(temp_ind(0))
ENDFOR
```
