
Subject: unwanted tick label

Hi,

when I try the following

```
plot,findgen(5),xstyle=8
axis,/xaxis,xtickv=[1.5,2.5],xticks=2,xtickname=['Lo','Hi'], $
xtitle='Only Want String labels'
```

it produces an "0.00" at the upper left corner. I don't want this. In the plot I need to make, I have a completely different numerical scale on this axis, so it's outright wrong. The label only appears if !x.crange is close to 0.

Right now as a workaround I am setting !x.crange=0.001. Is there a better way to get rid of this label? Is this a bug or a feature?

{ x86 linux unix 5.2.1 Jun 4 1999} on Debian Linux

thanks,
Mark Fardal
