You may wish to try my frame tools, which are available at
http://cimss.ssec.wisc.edu/~gumley/frame.html

For example:

```
device, decomposed=0, retain=2
fset
loadct, 0
tvscl, dist(32)
af
loadct, 3
tvscl, dist(64)
af
loadct, 13
tvscl, dist(128)
af
loadct, 39
tvscl, dist(256)
lf, delay=1.0
```

Cheers,
Liam.
