
Subject: widget library cross-platform compatibility

Hi all,

I've been doing a lot of widget programming in IDL lately, and was wondering a few things:

1. What is the most current version of IDL for MS-Windows?
2. Is the widget library for X/UNIX currently usable on the MS-Windows platform?
3. Will it ever be?
4. Is there a separate widget library for MS-Windows?
5. What about the X/UNIX widget library and Macintosh compatibility?

Thanks,

matthew
