> P.S. Who's this Coyote?

Coyote is well known to astronomers. When the Old People were carefully placing the stars into the sky in these beautiful constellations, Coyote stumbled into the teepee from a night out carousing and knocked the sack of stars everywhere. That's why it's such a jumble up there now.

Cheers,

David

P.S. Let's just say Coyote is inordinately fond of hanging out with IDL programmers. :-(
