This does not work using IDLDE for Windows -> only the first line of code gets copied. Therefore I end up copying > line by line (which is tedious) or just re-typing the command. > > I'm not sure if this is a problem for "young" or "old" farts, or maybe > just my own problem, but I know it has bothered me many times. > > -Steve IDLWAVE for emacs: "Run Region". Tremendously useful. JD
