Subject: GetData procedure
Posted by <hom on Thu, 24 Aug 2000 07:00:00 GMT

Thanks David!

I did some modifications to the program you gave me, and it is now doing
exactly what I needed!

My only question is if I want to pass a string to appear in the text field
as a default (just in case the user doesn't want to change it), how do I
set that value?

If you have any advice, I would really appreciate it!!

Aimy
