Subject: PV-WAVE Runtime Mode Balks
Posted by stevens on Fri, 25 Aug 2000 07:00:00 GMT

PV-WAVE Version 6.01 (sun4 solaris sparc): procedure which is OK in ordinary
interactive command line crashes in runtime mode startup from a csh session

        /usr/local/bin/pvwave6 -r waveplots,'FARFIELD/'

with error:

     Error getting config file data: No such feature exists (-5,154)

I've tried to make sure the environment

               WAVE_RT_STARTUP

is defined in the csh session and points to compiled (.cpr) startup file but
apparently to no avail.

What "feature" is missing and what's "(-5,154)" got to do with it?
