Subject: drop array elements Posted by Matthew Kay on Fri, 25 Aug 2000 07:00:00 GMT

Hi,

Would anyone have any suggestions for an easy way to drop elements in an array? For example, say 'a' is a 14x1024 array and 'b' is a 1x25 array of row indicies in 'a' that should be dropped. Is there a simple command for re-assigning 'a', without the 25 rows indicated in 'b'?

Much thanks, Matt
