Hi Folks,

The Exam Committee chairman has run off with the secretary over in the Bookstore and no one seems to know when he is coming back. So I've been asked to get a couple of exam questions together. I don't want to be unfair or anything, so I thought I would throw out a test question to see if I'm on the right track.

Ready?

What is the \*real\* purpose of the DIST function?

Cheers,

David
