I routinely include all sorts of IDL EPS files into
LaTeX. I use epsf.tex like this:

```
\input{epsf}
...
\begin{figure}
\epsfxsize=6.in
\centerline{\epsfbox{file.eps}}
\caption{blah blah}
\end{figure}
```

I use the stock epsf.tex file on [ftp.shsu.edu](ftp://ftp.shsu.edu)
quote site index epsf.tex

On PC-TeX for windows, I have a modified version:
anonymous ftp to <xray1.physics.sunysb.edu>
cd pub/msdos/pctex
get epsf.tex
