Subject: DEM and DLG in SDTS
Posted by Kelly Dean on Mon, 18 Sep 2000 07:00:00 GMT

The discussion about DEMs earlier got me thinking about it again.
Especially, after working with some recent MODIS imagery.

 Has anyone been successful with reading the 7.5 min DEMs and the DLGs
in the Spatial Data Transfer Standard (SDTS) format? USGS has a big
archive of DEMs and DLGs online, but in this binary SDTS format. Not the
simple ASCII files I have worked with in the past.
