
Subject: Altitude coordinate in Map Projection

Hello again!

I'm trying to plot the trajectory followed by an aircraft using MAP_SET, but i'm not pretty sure how to plot the altitude coordinate. Right now i just get the projection on the flat earth (only lat, lon coordinates).

As always, i'm in a hurry (no matter how early i begin to work)

Thanks

Luis =)

PD: sorry to repost, but i've got a problem w/my computer's clock and last post had a wrong date.
