Has anyone written something in IDL to read crystal structure files in any of the following formats:

pdb (<http://www.rcsb.org/pdb/> ; "Protein Data Bank"

cif (<http://www.iucr.ac.uk/iucr-top/cif/> ; "IUCr Crystallographic Information File"

shelx (<http://shelx.uni-ac.gwdg.de/SHELX/>)

etc.

Thanks for any pointers,
