Subject: Lung Segmentation Algorithms for IDL
Posted by John D. Newell, Jr. on Fri, 29 Sep 2000 07:00:00 GMT

Hello,

I am interested in hearing from people who have or are working on
semi-automatic or fully automatic algorithms for the segmentation of the
lung tissue from X-ray CT images. I am using a contour following algorithm
at the present time and I have used basic threshholding algorithms in the
past. Any information concerning this would be helpful.

thanks, John Newell
