Subject: storing ASCII_TEMPLATE templates for later use
Posted by Henk on Fri, 06 Oct 2000 07:00:00 GMT

Hi,

Is it possible to reuse ASCII_TEMPLATE structures for later use ?
I find it a very handy tool to describe ascii files, but I don't want to do
the whole procedure everytime I read a data file. Therefore I would like to
know how I can store the resulting structure in a file, or type it in in a
procedure. I will then be able to make a generic file reading routine for
all my data files.
Sorry if this is a stupid question, still learning...

Thanks,

Henk
