Oh, now **there** is an idea! :-)

And I've re-written all the widget programming chapters just for you. The 2nd Edition officially goes on sale November 1st, but I've been thinking of offering my friends on the IDL newsgroup a special pre-sale price. I'll probably make some kind of announcement about it next week.

Cheers,

David

P.S. I'm teaching a course this week and we are running IDL 5.4. When I went to show the folks how to make a GIF file yesterday, I discovered that you need a license to produce GIF files. I guess Kodak is a target big enough to attract a suit from CompuServe. Hello PNG files! :-)
