Subject: Curious about PVWave Posted by Chris Rennie on Tue, 03 Oct 2000 01:46:31 GMT View Forum Message <> Reply to Message

Hi,

I have been following this newsgroup for years, yet still don't know what PVWave is. Now, unsettled by the news that IDL will be absorbed Kodak, I finally looked up their web site and am a bit clearer. But can anyone tell me how it is that IDL and PVWave come to be so similar, and what are their relative merits? TIA

Chris Rennie
