Hello,

I have a problem calling an external shared library under HP-UX and
IDL Version 5.3 (hp-ux hp_pa). (c) 1999, Research Systems, Inc.

The message is:

```
/usr/lib/dld.sl: Call to mmap() failed - TEXT
/IDL/pro_src/RODENA/rod/hp-ux/up_share.so
/usr/lib/dld.sl: Permission denied
% CALL_EXTERNAL: Error loading sharable executable.
      Symbol: c_watershed, File =
/IDL/pro_src/RODENA/rod/hp-ux/up_share.so
```

...
I don't know what could have been changed causing this error.

Thanks in advance
