Hello,

I have a problem calling an external shared library under HP-UX and
IDL Version 5.3 (hp-ux hp_pa). (c) 1999, Research Systems, Inc.

The message is:

/usr/lib/dld.sl: Call to mmap() failed - TEXT

/IDL/pro_src/RODENA/rod/hp-ux/up_share.so

/usr/lib/dld.sl: Permission denied

% CALL_EXTERNAL: Error loading sharable executable.

Symbol: c_watershed, File =

/IDL/pro_src/RODENA/rod/hp-ux/up_share.so

...

I don't know what could have been changed causing this error.

Thanks in advance
