And the one I recommend is ImageMagick

http://www.imagemagick.org/

The only thing that GIF has, and PNG doesn't, is support for animation.
However there are alternatives. There's PNG's cousin MNG

http://www.libpng.org/pub/mng/

though it's still a bit immature and there's FLC, which doesn't have its own
WWW site but there's some good info at

http://crusty.er.usgs.gov/flc.html

I think RSI's decision to remove GIF support from RSI was the correct one in
the circumstances.
