: esrg.ucsb.edu apparently does not support anonymous ftp. Is this
: temporary? Any other sites that have the Emacs mode?

According to the file's header comments the FTP site is:
;; /jaameri.gsfc.nasa.gov:pub/idl/idl.el

There is also an idl-shell.el file, I'm not sure what's in which.

You should copy them over and put them in the emacs lisp directory and
also modify your .emacs file as described in the header.
