Whoops! I knew I had a 50% chance of getting that wrong, but since 80% of the programmers I see in Europe are men, I thought perhaps my first instincts were wrong. My sincerest apologies, Mrs. Gonzalez. You have at least an hour of IDL consulting sitting in your account here. :-)

Best Regards,

David

P.S. Let's just say things must be changing in Europe. I gave a lecture last week to 100+ first year science students in Copenhagen and I would say nearly 50% were women. This is always a good sign, since they are sometimes the only ones who laugh at my poorer jokes. :-)
