I haven't yet tested it myself (we are waiting for the card), but  
e.g. the Matrox G400 (now G450, I think) DH is supported in Dual Head  
configuration by XFree86 4.0.1  
I don't see why IDL should make problems with that...

This is of course again Unix, but I'm sure there are WinXX Drivers  
that come with the card...
