Subject: include files in IDL programs
Posted by Randall Skelton on Fri, 17 Nov 2000 08:00:00 GMT

Hello all,

This is a longshot but is there any way to have an 'include file' in IDL.
i.e. I have a data structure which is rather complicated (and big in type)
and I don't want to see it in every program/subroutine that I write. Is
there anyway just to have it included with a simple '#include blah.pro' or
somthing similar?

Thanks in advance,

Randall
