Hi,

I was waiting for updates to IDLgrContour in 5.4, but it looks to me that there still is no way to place labels on the contour lines (which is about the only way I know to make a contour plot useful). Is this true? Did some happy 5.4 owner try it? It sure looks to me that most enhancements to 5.4 have to do with "doubleizing" everything. Not to say that this is unimportant, but what about those obvious bugs in IDLgrROI that does not normalize? Are they fixed?

Cheers,

Pavel
