Hi All,

I was wondering if anyone has had problems reading save sets made with IDL V5.4 on older versions? Is this a feature? I can read old save sets on the new version. If indeed the savesets are not backwards compatible, that is very annoying!

```
IDL> print,!version
```

```
{ alpha OSF unix 5.4 Sep 25 2000    64    64}
```

thanks,

Jeff Newmark
