I am doing some equations using vector fonts and cannot seem to find the horizontal division line to express a fraction. The best I can do is the minus sign. For example, consider

```
plot,[0,1]
ss='!s-----!r!s!a(y2-y1)!r!b(x2-x1)'
xyouts,.1,.5,ss,charsize=2
```

The minus sign looks terrible. What is the code for the division line?

thanks-Peter Brooker
