Subject: SPACE-MOUSE = 3D-MOUSE

Posted by velser on Thu, 09 Jun 1994 11:25:12 GMT

Hello,

sorry I forgot to mention what a SPACE-MOUSE really is. A SPACE-MOUSE
is a mouse, you can move in three dimensions (this means you have
further information of depth).

We want to use this information in a 3D-tool under IDL. If someone
knows something about how to combine a SPACE-MOUSE whith IDL please
send a mail to me or post in this newsgroup. My e-mail address is

  velser@uni-paderborn.de

Thanks in advance,

Maik
