Subject: multiple filters take 2

A few days ago I asked about the possibility of using multiple file filters with a file selection program. After much fiddling with an old program, I decided to have a go at writing a new version that uses `DIALOG_PICKFILE`.

My question still remains - the help on `DIALOG_PICKFILE` seems make no sense - is it a Windows only option?

I can't work out from the help whether it is possible on Unix, or is it a feature request for RSI?

Alternatively, has anyone written their own version to allow for more than one filter?
