Subject: Using two different arrays in the same calculation Posted by ragnar on Wed, 08 Jun 1994 11:18:51 GMT

View Forum Message <> Reply to Message

I have the following problem:

I have two different arrays, (8) of float and (300,8) of float. I want to vectorize the equation and therefore I need to use both arrays in the same equation. For example :

newarray=cos(small_array)*sin(large_array)

where I want the data in small_array to be used over and over 300 times in this calculation.

Hope somebody can help me.
