howdy!

i'm trying to interpolate data from one irregular
2-D grid to another (different) irregular 2-D
grid:

- does IDL have any other built-in functions
besides MIN_CURVE_SURF that can do this?
- does anyone have any warnings regarding the
behavior of MIN_CURVE_SURF?
- has anyone implemented irregular-to-irregular
interpolations using other algorithms?

thanks!

best,
-Johnny Lin
