Although I don't know any way in IDL to do this, there are freeware
DICOM readers that can. To start, try Chris Rorden's mrico,
<http://www.psychology.nottingham.ac.uk/staff/cr1/mrico.html>
which has an anonymiser function.

ALternatively, you may find something else from
<http://www.dclunie.com/medical-image-faq/html/part8.html>
