Howdy,

I have been using the following function to select the appropriate OS specific directory separator. I have two questions about it: (1) what is the correct directory separator in VMS?, and (2) is there a built-in means of getting the same information?

Thanks,

Ben

;-----START
FUNCTION SYSSEP

```
Case StrLowCase(!Version.OS_Family) of
  'unix': Return, '/'
  'win':  Return,'\
  'macos': Return,:'
  'vms': Return, "
Else: Return, "
EndCase

End
;-----END
```
