---

I am currently writing a program that uses widgets. I encountered the following problem:

```
a=widget_base(xsize=800,ysize=800)
```

```
b=widget_base(a, xsize=400,ysize=400)
```

```
c=widget_draw(b, xsize=200, ysize=1000, x_scroll_size=200, y_scroll_size=200)
```

After I realize them, and then :

widget\_control, b,/destroy

and then once again, define b and c (c has different size now)

IT DOES NOT WORK PROPERLY!

COULD SOMEONE PLEASE EXAPLIN TO ME WHY?!

please email to:

shvetsky@sxt1.mtk.ioa.s.u-tokyo.ac.jp

Thanks!!!!!!!!!!!!!!!!!!!!
