Subject: Good text for beginners?
Posted by Dan Drew on Sun, 18 Feb 2001 12:55:12 GMT

I'm trying to learn IDL 5.2 for Windows and I'm a beginner, and have
discovered quickly that this is no easy language. I used Mathematica quite
a bit as well as a little Macsyma. Do any of you have a recommendation for
a beginning text? I suppose the Fanning book would be the natural choice,
but I'm not sure. Thanks.

Dan
