They don't mention 'blue' because the color is given as a number. Change (or add) the line

Idl*background

in either .Xdefaults or in /usr/lib/X11/app-defaults/Idl. For example,

Idl*background: #bfbfbfbfbf

gives cool-looking chiseled (sp?) steel look.

Greg.

PS. You may need to run xrdp or restart X-windows to make changes take effect.
