Subject: Binary Files
Posted by Mike Garrett on Wed, 28 Feb 2001 23:09:44 GMT

Hey all,

I am trying to read some binary files that I created using the unformatted write in fortran90. The only problem is that these are the REAL variable type and I don't know how to read these in IDL. I looked for some documentation on the lenght of this data type but I didn't have any luck. Has anyone else already done this?

Thanks

Mike
